/a For state-administered programs, estimates by district are net of state administrative costs and other state-level activities. As a result, the sum of all districts will not equal state totals reported elsewhere. This applies to at-large districts as well. The difference will be the amount retained by the state for its own purposes, as authorized.

/b Under the House version, the maximum Pell Grant award would be \$5,350 for the 2009-2010 academic year, and \$5,550 for 2010-11. Under the Senate version, the maximum award would be \$5,131 and \$5,450, respectively. All maximum awards include mandatory funds.

/c Under the House version, the federal share per child would be 25.7 percent in FY 2009, and 26.2 percent in FY 2010. Under the Senate version, the federal share per child would be 36.3 percent and 16 percent, respectively. These percentages will most likely change when estimates of children served and APPE are updated upon release of the federal budget proposal for FY 2010.

/d Estimates include formula subgrants only and exclude competitive awards to high-need local educational agencies. Formula distributed subgrants represent half of all funds available under the program.
